Version 3	RNE	08.01.2018	Update of the TMI information
Version 4	RNE	13.01.2019	Update of the TMI information
Version 5	RNE	10.01.2020	Update of the TMI information

Foreword

On one side, the RFCs and the IMs are requested to provide the same kind of information to the same recipients: sometimes they have to do it more than once and in different ways; on the other side RNE has already experienced activities where a common structure by which different content should be given has been agreed upon (for example the Network Statement structure) and/or where another guideline, providing also similar traffic management information, is available (for example RNE Priority rules in operation).

RNE has started a project with the goal to analyse the situation in the area of traffic management information. The project team, consisting of the representatives from IMs and also RFCs, develops the common structure for providing the traffic management information in a harmonised way in different documents (e.g. CIDs), collected the relevant traffic management information and made a proposal for their usage and publication.

Part 1 Overview is providing a detailed overview of the traffic management information content and structure. The concrete traffic management information for the RFCs is available on RNE website.

The common structure for the traffic management information (as part of RFC CIDs) is defined in Part 2 Common Structure.

PART 1 – OVERVIEW

1 Introduction

On one side, the RFCs and the IMs are requested to provide the same kind of information to the same recipients: sometimes they have to do it more than once and in different ways; on the other side RNE has already experienced activities where a common structure by which different content should be given has been agreed upon (for example the Network Statement structure) and/or where another guideline, providing also similar traffic management information, is available (for example RNE Priority rules in operation).

This document is providing a detailed overview of the traffic management information content and structure and the annexes are providing the specific traffic management information for the RFCs related border sections.

Table 1 List of traffic management information

Topic	Content	Availability
Border crossing	<i>Infrastructure features and operational rules relevant for the border sections along the corridor</i>	<i>See Part 1 Overview section 2.1 Border Section and Annex 9.1.1</i>
Traffic management	<i>Existing bi or multilateral agreements (including safety issues)</i>	<i>See Part 1 Overview section 2.2 Border Agreements and Annex 9.1.2</i>
Operational scenarios on the border in case of disturbances	<i>Operational scenarios in case of disturbance (including alternative routes)</i>	<i>See Part 1 Overview section 3.2 Operational scenarios and annex 9.1.3</i>
Dangerous goods	<i>Usage of RID regulation or description of rules</i>	<i>See Part 1 Overview section 5 Dangerous goods and annex 9.2.1</i>
Exceptional transport	<i>Usage of the UIC Leaflet 502-1 regulation or description of rules; national contacts</i>	<i>See Part 1 Overview section 6 Exceptional transport and annex 9.2.2</i>
Contacts	<i>Name, phone contact, email, working time (OSS contact person)</i>	<i>See Part 1 Overview section 7 Contacts</i>

2 General information – summaries

In the tables below, the overview of the availability, completeness and reliability of provided information within this document are listed.

Explanation of the colors used in the table:

Green color	the data are provided, up to date and complete
Yellow color	the data are partially provided (some information may be missing, or may not be up to date)
Red color	no information are provided

Table 2 Status of Corridor related information

2.1 Border information

For each RFCs related border section, the following information is provided:

- » Border Section – line to/via when relevant
- » Parameters on lines
 - Train weight (in tons)
 - Total train length - limit (in meters)
 - Type of engine (E = electric; D = diesel; B = both)
 - Number of tracks
 - Profile
 - Loading gauge
 - Vehicle gauge
 - Speed km/h
 - Axle load
 - Other
- » Relevant rules for border station
- » Language
 - Language 1
 - Language 2
- » Possibilities running through the border
 - Administrative
 - Technical
- » Break down of the system
 - Communication failures
 - Safety system failure
- » Remarks

The actual information for all RFCs related border sections can be found at RNE website.

2.2 Border agreements

The 2 levels of border agreements were identified:

- » Level 1 – border agreements on the state (ministerial) and/or IM level
- » Level 2 – border agreements related to the single border section

For both border agreements level 1 and level 2, the following information is provided:

- » Title of the border agreement
- » Description
- » Validity from
- » Language
 - Language 1
 - Language 2
 - Language 3
- » Contact persons
 - IM1 (Name and Address)
 - IM2 (Name and Address)

The actual information about border agreements can be found at RNE website.

3 Traffic Management in case of disturbance

3.1 Communication (ref. Guidelines under construction)

Communication procedures in case of disturbances are not covered within this document. They can be found on the RNE website, in the document Guidelines for Communication and cooperation between traffic control centers.

3.2 Operational scenarios

For each RFCs related border section, the following information is collected:

- » Line to/ via/ direction/ sub-section when relevant
- » Timeframe to inform the RUs in minutes
- » Expected time of restriction
- » Re-routing via pre-defined lines (an indication of the new route)
 - Parameters on lines
 - Train weight (in tons)
 - Total train length - limit (in meters)
 - Type of engine (E = electric; D = diesel; B = both)
 - Number of tracks
 - Profile
 - Loading gauge
 - Vehicle gauge
 - Speed km/h
 - Axle load
 - Train Control system
 - Other

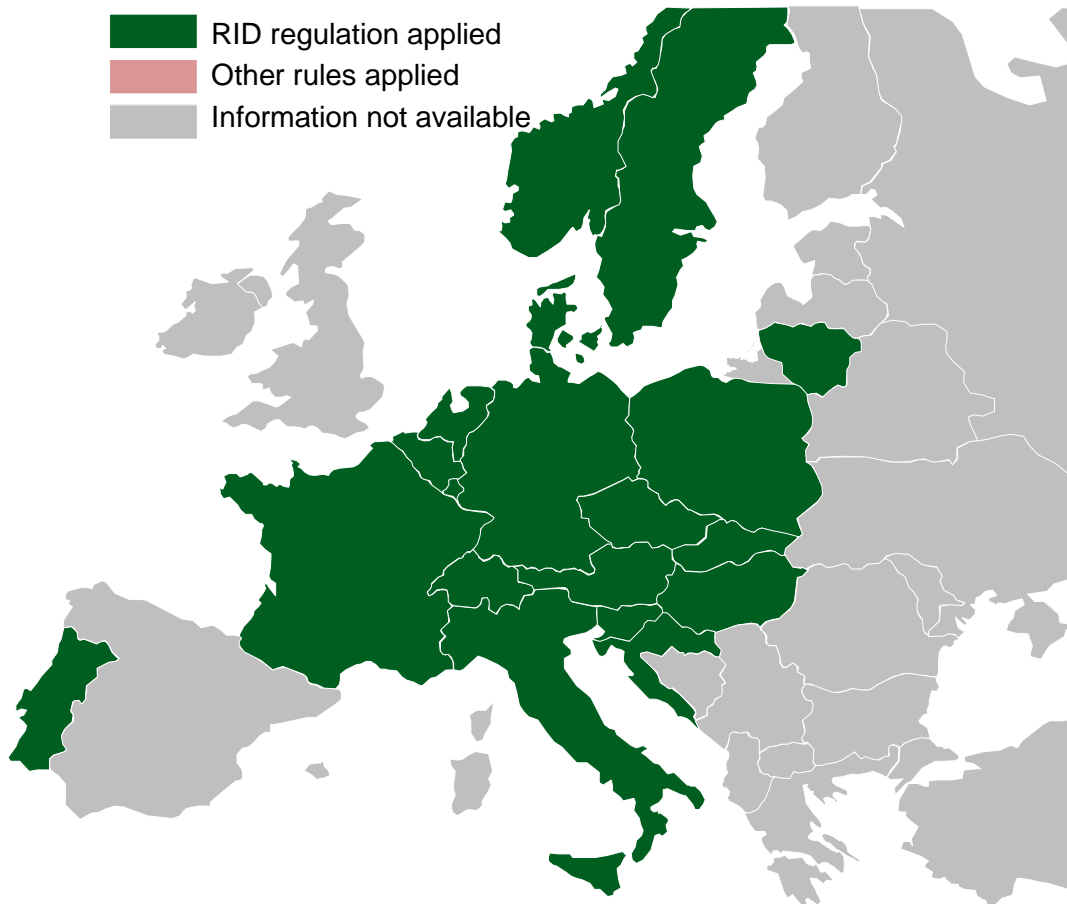

The actual information about operational scenarios for all RFCs related border sections can be found at RNE website.

4 Traffic restrictions

Information about actual restrictions can be found on the IMs and/or RFCs website.

5 Dangerous goods

On the map below, the overview of rules applied by every single IM for dangerous goods transport is provided. The detailed information concerning the dangerous goods transport per each IM can be found at RNE website.

6 Exceptional transport

On the map below, the overview of rules and definition of exceptional transport within each single IM company is provided. The detailed information concerning the exceptional transport per each IM can be found at RNE website.

7 Contacts

The following representatives of RFCs are responsible for the updates of the traffic management information provided in the annexes of this document.

RFC	Contact person	Email
RFC 1	<i>Karl Guntern</i>	karl.guntern@sbb.ch
RFC 2	<i>Marie-Anne Menguy</i>	marie-anne.menguy@reseau.sncf.fr
RFC 3	<i>Goran Holmberg</i>	goran.holmberg@trafikverket.se
RFC 4	<i>Will be added</i>	
RFC 5	<i>Alessandro Turconi</i>	al.turconi@rfi.it
RFC 6	<i>Istvan Pakozdi</i>	i.pakozdi@railfreightcorridor6.eu
RFC 7	<i>Will be added</i>	
RFC 8	<i>Ann Verstraelen</i>	ann.verstraelen@infrabel.be
RFC 9	<i>Will be added</i>	

8 Update procedure

The aim of this procedure is to avoid the delivery of different updates chronologically too close to each other while ensuring correctness of the displayed information.

The change in nationally and internationally applied to rules relevant to traffic management, to infrastructural features or technological equipment happens rather seldom, therefore it is sufficient to allow the modification of the Overview **once a year only**.

Modifications not communicated in due time or occurring after the decided deadline (see below) will be reflected in the following yearly update.

8.1 Actors involved and responsibilities

The actors involved in this procedure are:

- » RNE responsible person (afterwards “RNE”);
- » IM responsible persons (afterwards “IMs”), appointed by each IM;
- » RFCs responsible persons (afterwards “RFCs”), appointed by each IM – listed in section 7.

RFCs are generally responsible of communicating to RNE every modification relevant for the information contained in the Overview. IMs support the RFCs representatives. This approach was chosen because most RFCs already have in place procedures to update Traffic Management-related information pertinent to the RFC itself.

In the case of border section belonging to more than one RFCs, both RFCs can provide the relevant data. RNE will check the coherency of the received information and take the necessary actions to grant it.

If the modifications exclusively concern the RFCs own information, they are automatically accepted by RNE. The same is valid for minor modifications which do not change the meaning of the document (layout, grammar, editing ...).

Should an IM or RFC require a major modification of the document, this modification shall be done according to the RNE general rules for document update and modification and the procedure described here is no more applicable.

RNE is responsible to apply the required modifications on all materials (Overview, web-page ...) and to take care of the technical maintenance of the web-page according to defined service levels.

8.2 Phases of the procedure

This procedure consists of 5 steps:

1. RNE shall send a reminder to the RFCs 10 weeks before the deadline for delivering the yearly update
2. The RFCs who realize that a change in the document is needed or that its priority rules in operations have been changed must communicate this change to RNE within 4 weeks. For delivering the yearly update form (Annex 10) should be sent to the following e-mail address: juraj.maliacek@rne.eu

3. During the next 4 weeks, RNE will apply the required modifications (asking for clarifications and/or explanations to RFCs if needed)
4. RNE delivers the updated overview to IMs and RFCs who should check it within 2 weeks
5. Delivering of the new version and update of the web-page on the fixed date

8.3 Deadlines

The deadline for the update described in this document corresponds to the deadline for the publishing of CIDs, which is 2nd Monday of January.

For 2019-2020, the calendar will be:

- » Reminder: 6.11.2019
- » Deadline for change request: 4.12.2019
- » Update publication: 13.01.2020

For 2020-2021, the scheduled calendar will be:

- » Reminder: 2.11.2020
- » Deadline for change request: 4.12.2020
- » Update publication: 11.01.2021

9 Annexes – detailed tables (xlsx)

All detailed traffic management information on specific border section can be found in the separate excel file.

10 Data collection form

TM_Info_template.xlsx

PART 2 – COMMON STRUCTURE

1 Foreword

On one side, the RFCs and the IMs are requested to provide the same kind of information to the same recipients: sometimes they have to do it more than once and in different ways; on the other side RNE has already experienced activities where a common structure by which different content should be given has been agreed upon (for example the Network Statement structure) and/or where another guideline, providing also similar traffic management information, is available (for example RNE Priority rules in operation).

In this document, the common structure for providing the traffic management information is defined.

2 Addresses and use of this common structure

RNE organised the project, whose goal was to define the common structure for publishing the traffic management information.

Persons listed in the table below were the members of the project team, which has defined the structure and content of this document. In case, the revision or changes to the common structure are needed, they can be contacted, and the project can be reestablished.

Table 4 IM members responsible for common structure

First Name	Surname	Company	Email	Phone
Ivana	Tomekova	RNE	ivana.tomekova@rne.eu	+421 905 717 031
Uroš	Zupan	SŽ	uros.zupan@slo-zeleznice.si	+386 129 13 226
Eddy	Verzelen	INFRABEL	eddy.verzelen@INFRABEL.BE	+32 2525 4706
Robert	Reding	CFL	robert.reding@cfl.lu	+352 4990 3462
Tobias	Behringer	DB	tobias.behringer@deutschebahn.com	+49 69 265 19767
Miroslav	Zuber	ŽSR	zuber.miroslav@zsr.sk	+421 2 2029 3024
Maarten	Gutt	PKP PLK	maarten.gutt@plk-sa.pl	+48 60003700
Marie	Wallroth	TRV	Marie.wallroth@trafikverket.se	

This common structure will be delivered to the RFCs and they have to follow it in their CID and/or any other document/tool used to provide their traffic management information.

2.1 Short term: CID

As the structure of the CIDs is already agreed upon between RFCs, this common structure will be proposed as an input for the CID update. Some adaptations might be needed and if this will be the case, the project team responsible for the common structure might be contacted.

2.2 Long term: CIP

Information to be fully integrated into CIP

3 Common structure

N. ¹	Heading	Implementation guide	Remarks
5	Border section information	<i>Generalities</i>	
5.1	Border crossing	<i>Describe infrastructure features and operational rules relevant for the border sections along the corridor – see Overview section 2.1 and Annex 9.1.1</i>	
5.2	Traffic management	<i>Briefly describe existing bi or multilateral agreement – link to the actual documents – see Overview section 2.2 and Annex 9.1.2 Includes safety issues</i>	
6	Priority rules in traffic management	<i>Briefly describe existing common priority rules or principle at corridor level (if existing) and/or link to national priority rules</i>	
7	Traffic management in event of a disturbance		
7.1	Generalities		
7.2	Communication	<i>Describe the agreed procedures for communication between TCCs in case of disturbance or refer to RNE Guidelines (under construction)</i>	
7.3	Operational scenarios on the border in case of disturbances	<i>Describe operational scenarios in case of disturbance (include alternative routes) – see Overview section 3.2 and annex 9.1.3</i>	
8	Traffic restrictions	<i>Describe where the information about traffic restrictions can be found or to whom should be asked</i>	
9	Dangerous goods	<i>Explain whether the RID regulation is used or not (if not, describe rules) – see Overview section 5 and annex 9.2.1</i>	
10	Exceptional transport	<i>Explain whether the UIC Leaflet 502-1 regulation is used or not (if</i>
