

Main Feedback from Webinar on EFCM Priority Processes (1)

Capacity Rights & Capacity Specifications

- Specify/limit use cases for Capacity Specifications
- Timely Conversion to paths for production and customer information
- Anchor point should be co-designed with applicants

Capacity Model Consultation

- Review thresholds of CMOs to better meet market requirements
- Consider impact on Capacity Supply Plans

Capacity Supply Plan Consultation

- Higher applicant involvement to gain optimization potential
- Harmonized TCR handling in traffic solutions

Main Feedback from Webinar on EFCM Priority Processes (2)

Rolling Planning

- Complete process overview is needed for better analysis
- Joint definition of volumes (IMs-Applicants)
- Cap. Models and Supply Plans must reflect available and booked RP capacity (O-D)
- No Capacity Specification allocation for first TT period
- Reconsider conversion period X-9.5-X-7.5

New Capacity Requests

- Continuous request process without gap(s) needed
- Capacity Supply Plans must be stable after X-11
- Consultation phase is needed in Late Path Request and Ad Hoc

Feasibility Studies

- Retain Feasibility Studies for defined use cases

Framework Agreements¹

- Apply results of SERAF (in subsequent EFCM iterations)
