Disclaimer: For Operation and Market Development KPIs

- The calculation method changed in 2024, and the figures are not comparable with the previous years. A new train definition was used to calculate 2024 figures.

RFC Train Definition description: An RFC train is defined as a freight train that crosses at least one international border and operates on designated RFC network routes.
To be classified as an RFC train, it must meet the following conditions:

- Be a freight train;
- Cross at least one international border;
- Operate fully or partially on an RFC network section;
- If an already identified RFC train runs 300 km or more within the network of a different RFC without crossing its border, it is still classified as an RFC train of that corridor;
- Assignment Rules for Overlapping sections of RFC Corridors:

Trains on fully overlapped sections:

- All trains running on completely overlapped sections are assigned to all the corridors involved. However, the concerned RFCs may apply additional criteria to assign a train to a single corridor based on the specific situation.

Trains running partly in overlapped sections:

- If a train crosses one border along the RFC and runs at least one section exclusively within a single RFC, it is assigned to that RFC.
- If a train operates on an overlapping section, but there is at least one corridor that can also cover the previous or following non-overlapping section, the train will be assigned to that corridor(s) only.

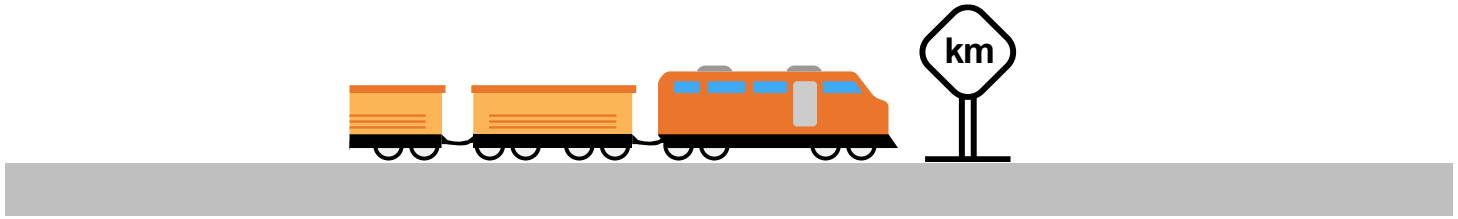
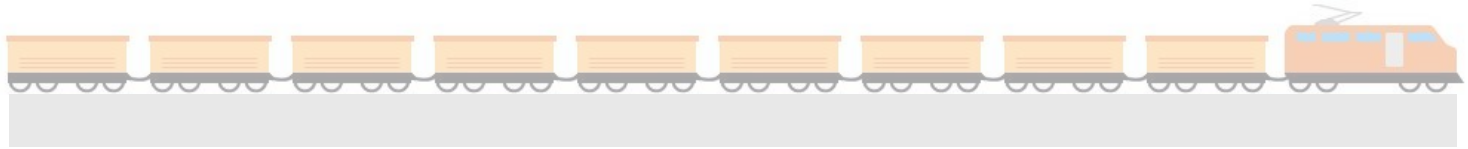
Train Kilometers (million) of trains per RFC*



2024: **12.61 mio**

*The calculation of this KPI is based on data in RNE's TIS. International freight trains crossing a border of an RFC are considered in the calculation. The presented data might differ from the data gathered in the national systems due to data quality differences between individual IMs.

Number of trains per RFC*



2024:	**24,966**

MARKET DEVELOPMENT

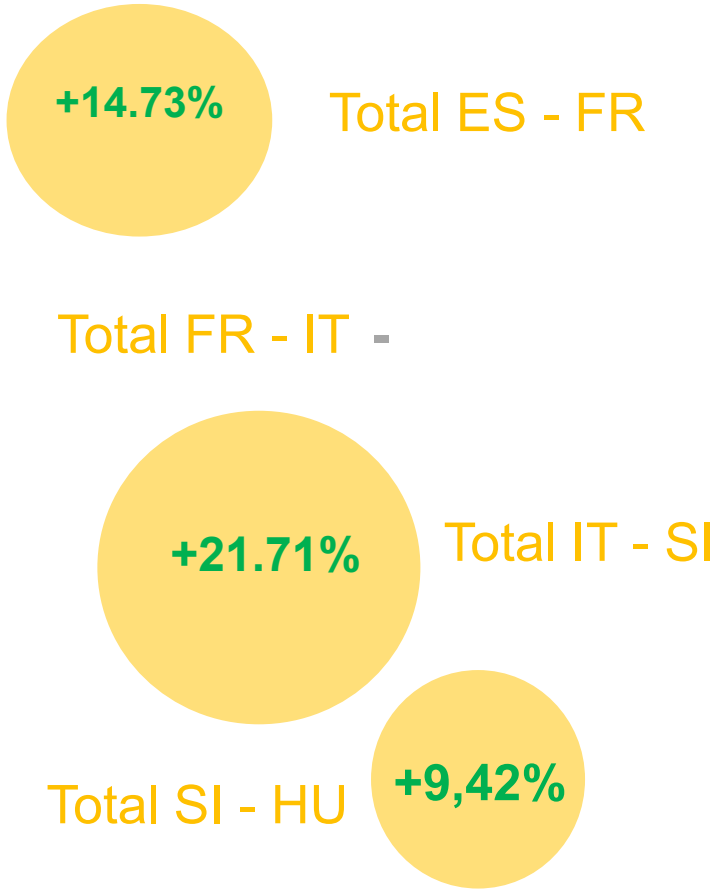
MARKET DEVELOPMENT

Number of trains per border - Part 1*

	2022	2023	**2024**
Total ES - FR:	4,682	3,678	**4,223**
Total FR - IT:	8,546	3,352	**CLOSURE OF THE BORDER IN 2024**
Total IT - SI:	7,522	7,612	**9,265**
Total SI - HU:	6,297	6,492	**7,104**



*The calculation of this KPI is based on data in IMs' systems. The total sum of the figures per border does not correspond to the figure of the KPI 'Overall number of trains on the RFC' due to, among other reasons, the potential double-counting of trains crossing more than one border.

MARKET DEVELOPMENT

Number of trains per border - Part 2*

*In case of border points with more than one C-OSS responsible (in case of common offer or in case of overlapping sections), the KPI figure presents the combined number of all C-OSSs concerned.
**Closure of the line.
*** Due to the closure of the line until 31/03/2025 and the time needed to restart the trafics. KPI make on the 6 last months (from July to December)

» The KPIs reflect the performance of each individual RFC, therefore, when comparing the figures of various RFCs, the specificities of each one have to be considered. Each RFC may apply any additional KPIs, which are published in their annual reports on their websites and/or in the Customer Information Platform (CIP), where applicable.

» Please refer to the annual reports of individual RFCs for comprehensive information concerning the figures and their analysis. In addition, you can find the description of each commonly applicable KPI in the RNE 'Guidelines for Key Performance Indicators of Rail Freight Corridors'.
